-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There is no antecedent basis for "the constant outer diameter".

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Butts et al. (6,387,101). Butts et al., in figures 46-52, for example, disclose injector body having a tip comprising a compression segment (left portion of nozzle 1022) and insertion segment (e.g. 1106) having slot 1116 through a

Art Unit: 3731

portion that extends from the open end, the portion having the slot having a substantially constant outer diameter (noting that the diameter of the portion having slot 1116 as measured in a direction from the top to the bottom of figure 47 is nearly constant). Alternatively, it would have been obvious that the diameter of the portion having slot 1116 as measured in a direction from the top to the bottom of figure 47 is nearly constant since the figure shows the lines denoting the top of portion 114 and the bottom of portion 112 as being substantially parallel.

Claims 14 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Butts et al. (6,387,101). Butts et al. fail to disclose the specific dimension and the slanted face. However, it is old and well known to make the size and shape of an insertion segment of an IOL injector as claimed in order to obtain the advantage of permitting easy insertion of the injector into the eye. It would have been obvious to so size and shape the Butts et al. IOL injector so that it too would have this advantage.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Thaler whose telephone number is (571) 272-4704. The examiner can normally be reached Monday to Friday.
